

How to Bookmark

Let's start out within a specific Ad that another user has posted.

Towards the upper half of the screen, off to the right, you will see the bookmark icon. This should be pressed if you are interested in this exact book but are not ready to buy it from this seller just yet.

Once pressed, you will see the icon change to signify that this Ad has been added to your Bookmark list. The Bookmark list can be found in the upper right corner within the menu page, which is revealed once you press the menu button.

From here select anywhere on the icon or the word to be taken to the Bookmarks page. Here you see that specific Ad is now saved for you to return to anytime.

Now let's provide an example of what happens when the Ad you saved is no longer available.

On a separate visit to MyBeeble you enter back into the Menu page and select Bookmarks, now you see a message that tells you "Post Removed consider adding to Wish List".

From here you have a decision to either add this book to your Wish List or delete the Bookmark. This can be deleted by pressing, holding and sliding your finger from the right to the left to reveal the delete button. Or you can press Edit button found in the top right corner and select Trash to delete the Ad.

Or if you prefer you can select add to Wish List and be notified next time someone post this book for sale in your area.
